¶ The great Cicle of Easter

Containing A short Rule:

To knowe vppon what day of the month Easter day will fall, made for the vse of *such as would without their booke readily find out,* and declare as well Easter day, as the other moueable *Feastes in the yeere: the dominicall letter,* the Epact the age of the Moone, her shining and the course of the tide. With other necessarie Tables to learne out the course of the yeere, By Io, P. 1583.

Ieremi. 10. 2. 3.

¶ Learne not the way of the heathen: And be not afraide for the signes of heauen, though the heathen be a fraide of such, for the customes of the people are vaine.

Gene. 8. 22.

Hereafter seede time and Harueſt, and cold and heate and Sommer and Winter, and day and night shall not cease so long as the earth remaineth.

Set foorth according to the Queenes Iniunctiones.

Imprinted at London by I. C. for Thomas Butter.

To the Right

Worshipful, and his speciall good freend Maister VVilliam Roe Alder-*man of* London, Iohn Pett *Gentleman*, wisheth health and peace in Christ, with increase of Worship. &c.

IT is an vsual thing *among men of our time, like as they haue learned of the former age, (Right worshipfull and my deere freend) to expresse and make manifest their good will towardes such as they accompt most deere vnto them, by offering or presenting vnto them, some fruite of their labour and studie. Among whom if I had perswaded my selfe, that the minde of the giuer were not more regarded and esteemed of men, then the moitie of the gift offered, I would not presume to haue any place. But beeing already sufficiently perswaded of your good will towardes me, diuers times and many waies heretofore expressed, (though mine insufficiencie to requite the least part of your*

ship would holde mee backe) I haue beene bold vnder your name, as a defence to publishe this little booke, containing. A rule to finde out Easter day & other moueable feastes with the Domnicall Letter for euer. &c. *Therby minding to witnes vnto all, how ready I am to shew my selfe thankeful vnto my well willers, and freends Among which I accompt your worship not the leaſt, by whō I was alſo procured to ſet foorth that, which otherwiſe for the ſmallnes & ſimplenes therof, I ſhould haue wrapped vp in a paper, neuer to haue felt the Preſſe. So that beecauſe you ſeemed deſirous, that I ſhould make that common, which heeretofore I had priuatly acquainted your worship withall. Beeing perſwaded that it would be well liked and accepted of ſome men, as you beſt know. And alſo for that (as I perceiued by an olde table which I ſometime found in* Ireland, *made to the ſelfe ſame ende.) This rule was practiſed aboue 100. yeeres agoe, as wel, to ſatiſfie your requeſt as to correct that which was ſo longe agoe attempted, and left very falſe and vnperfect, I am bold to offer the ſame vnto you in ſuch ſort as I could in reſpect of mine other buſines, conueniently rid it*

out

out of my handes. VVhich is the cause that it is not so large as I had sometime purposed. The vse heereof I will not in many words commend especially vnto you, who knoweth best howe far and to whom it is profitable, euen for such as would ease them selues of being alwaies tyed to their Almanake or Kalẽder. And would readelie knowe the dayes as well feastes as other, and such like thinges, without the helpe of any Kalẽder. And I will onely desire you as my speciall good freend. To take in good part my good meaning, in token of thankefulnes towardes you & of good will towardes those that shall vouchsafe their paines to peruse. God almightie blesse you and yours, in or through his Christ to whose safe protection I commend you. From my house at Seuenock *in* Kent *this.*

Your freend to his power.

Io. P.

To the Reader.

I Haue beene requested (gentle Reader) long agoe to put in Printe this short rule, for the ease of them, that would bee cunning to knowe the chaungeable course of the moueable feastes in the yeare. But being partly hindred by my affaires in the world, and partly discouraged as wel through the simplenes of the worke as also least I should seeme to take from other men ỹ prayse due to their worke, by intermedling their labour with my small skill. I haue hetherto slacked my hand, from that which willinglye I would haue performed, vntill now at the last beeing ouercome with the perswasion and request of some, that thinke it a thing needfull as well for the ease of them, that alwaies in their affaires neede the vse of a Kalender, as also for the quickning of the memorye of such young Schollers, as would readily, speake of the changeablenes of ỹ yeares by

by the altering of Easter day and other festiuall dayes frō one day of the month to an other, I haue put it forth, not minding to prejudice the worke of any man, who haue heretofore published such tables, as hereto are annexed, nor yet to offend their mindes.

Therefore I would request thee (good Reader) to haue pacience and charitably to iudge of my trauell herein, taken in hand for ỹ benefit of such as shall imploy some small time and labour to learne these fewe verses & rules without the booke, whom and whose labour I commend in my prayer to the blessing of God, who turne all our endeuours to his glory. Seuenock this,

Thine in the Lord,

Io. P.

The contentes

of this booke.

First a Kalender of the xii. monthes.
A rule to know vpon what day Easter day falleth for euer made in Latyn verses, and for the Dominicall Letter.
A declaration of the meaning of those verses.
A Table to finde out Easter, made to confirme the former.
A declaration of the same Table.
A Table of the moueable Feast.
The meaning of the same.
Two Tables to finde out the Dominicall letter, the Prime and the Epact.
The meaning of the same two Tables.
The vse of the Epact.
A Table for the shining of the Moone.
A declaration of the vse thereof.
A Table for the Tyde in certaine places.
A Table of the Kinges of *England*, with the time of their raigne.
The beginning and endinge of euery Terme with their returnes.
A rule to declare how many daies euery month hath which is a very short and olde rule.

BEfore thou enter in o theſe verſes (good Reader) knowe this, that thou haſt n› matter to behold in the courſe of theſe wordes. And I am right ſory that I could not ſet downe ſome good matter, either ciuill or diuine, (ſuch is mine vnſkilfulnes in Poetry, and in ſuch thinges *tam curta ſupellex*) to occupy the Reader withal. I therefore thought good to refer that to the better learned, whom I would earneſtly requeſt to vouchſafe ſo much paines, as to newe pen theſe verſes, ſo that the readinge thereof may miniſter ſome knowledge to the dilligent Reader, beſides the purpoſe for which they are now ſet downe. And I will (God ſo willinge) beſtowe the coſt of the new printing of thē. Further more whereas I haue fayned ſome wordes beginninge with K. and with Y. and haue ſet downe & and .g. for words and letters. Let him that can with better ſkill deuiſe ſome better courſe and take the commendacions due to his labour. I ſhalbe glad to ſee it accompliſhed. The Lord Ieſus preſerue vs euermore.

A declaration

of the meaning of these Verses.

BY these Verses which hære are written with letters and figures, directly placed ouer euery word. You may knowe Easter for euer, whether it wilbe hye or lowe, you may also know the Dominicall Letter, the leape yære and the Prime for euery yære, for ouer euery word you shall finde the Prime, and vnder the Prime the Dominicall Letter, and when you finde two letters together ouer one word, that signifieth the leape yære, and the latter Letter is the Dominicall Letter for that yære.

These Verses, may bee called the Cicle of Pascha or of Easter, containing in it selfe 532 yæres. At the ende whereof Easter hath his recourse to the first, & so orderly kæpeth to the ende of these Verses againe making his reuolution in the said 532. yæres.

And in this great Cicle of Pascha, may bee numbered contained and multiplied 19. common Cicles of the Sunne, of the which euery Cicle containeth 28 yæres, likewise in this great Cicle of Pascha may bee contained numbred

bred and multiplied 28. common Cicles of the Mane, euery Cicle containing 19, yeres. And therefore I haue thought good to call it the great Cicle of Pascha for when these Uerses are ended and 532. yeres past and spent. Then must you returne and beginne againe with the first Uerse Grande, Bonum, Tribus, &c. and with the same number of the Prime and with the same Letter and so forth as you did before.

Nowe to vnderstand it more perfectly you must note that, the wordes of them selues signifie nothing, but the first and last letters of euery word are onely to be obserued, for the first letter signifieth the day of the moneth. And the last letter signifieth the moneth. Euery word ending in M. noteth the moneth of March. All other wordes wherein soeuer they ende, do represent the moneth of *Aprill*, the first letter of euery word sheweth the day of eache moneth, And because that Easter kæpeth his course from the 22. of March vnto the 25 of *Aprill* and passeth not those two dayes, therefore you must reckon the dayes by letters thus beginninge with. a b c d. &c.

For example, when you haue any word that representeth Aprill (which you must knowe by the last letter of the word not being M. as I haue shewed) then the first letter of that word if it be A as *Amans* signifieth the first day of *Aprill*,

Aprill, if it be *B.* as Benefactis. it is the second day of Aprill, if it be C. as Cuius. it is the thyrd of Aprill, if it be T. as Tunc, then it noteth the 19. of Aprill. vppon which day Easter day wilbe the next yeere. 1584.

And because we haue 25. dayes in Aprill to reckon vpon, for that Easter day falleth sometime vpon euery of them. I am constrained to faine wordes beginning with K. as Karitas, Karolus, and also with Y. as Ysus. Therefore if you finde Y. or the Greeke *v.* to bee the first letter of the word, it signifieth the 22. day of Aprill, or if it be Z. it is alwayes the 23. day of Aprill.

Furthermore when you finde &. by it selfe thus written &. and 2. by it selfe so written, as I was constrained to take them for letters to make vp my number of 25. So must you take them for wordes, &. signifying the 24. of Aprill, and 2. signifying the 25. of Aprill. And therefore before you, I haue set downe my rowe of letters 25. in number,, with the dayes of *A*prill ouer their heades according as each letter doth note in the verses going before.

Aprill.	1.	2.	3.	4.	5	6.	7.	8.	9.	10.	11.	12.	13.	14.	15.	16.	17.	18.	19.	
	a.	b	c.	d.	e.	f.	g.	h.	i.	k.	l.	m.	n.	o.	p.	q.	r.	s.	t.	
Aprill.	20.	21.	22.	23.	24.	25.														
	v.	x.	y.	z.	&.	2.														

As thus you perceiue the letters of the Alpha-

bet reckoning them for Aprill, to goe forward: So contrary wise for March, you must reckon them backward, where wee are to reckon but 10. lettters to serue for 10. dayes of March, that is from the 22. to the 31.

So that when you finde a word signifying March, and that is when it endeth in M. Then if the word begin with A. as Aurum, it noteth the 31. day of March on which day Easter day was this present yere 1583. if it begin with B. as Bonum, that noteth the 30. day of March, if it begin with C. as Coelum, that sheweth the 29. day of March. As this rowe of letters with the number of the daies of March ouer their heades according as they signifie in the Verses, shall declare.

March.	22.	23.	24.	25.	26.	27.	28.	29	30.	31.
	k.	i.	h.	g.	f.	e.	d.	c.	b.	a.

Remember alwaies that the word must ende in M to represent March, as is shewed you before.

Nowe the numbers and letters ouer euery word, do shewe the Prime and the Dominicall letter, for euery yere, like as euery word includeth a seuerall yere, to shewe Easter day.

Furthermore, when you are come to this perfection by learning, and considering these verses, that you can shewe from yere to yere, vpon

what

A rule to finde Easter.

what day of the moneth Easter will fall, and then would be desirous to tell also without booke what is the Dominicall letter any yeare. I haue added heere two verses in Latin and two in English (either will serue your turne) to helpe your memory, to shewe what letter standeth vpon the first day of euery moneth, so that reckoning from the first day of the moneth vnto the day vpon which you finde Easter day to fall, you haue the Dominicall letter. And so may ye call to minde, what was the Dominicall letter many yeares past, to saue the labour that I haue knowen some men to take, trudging vp and downe for Almanackes of 20. or 30. yeares past, onely to knowe what was the Dominicall letter such yeares past.

These Verses are.

Ianuary. February. March. Aprill. May. Iune.
Alta. Dedit. Dominus. Gratis. Benedicit. Egenis
Iuly. August, September, October. Nouēber. Decēber.
Grandia. Christe. Facis. Astute. Dœmona. Fugas.

Or thus in English.

Ianuary. February. March. Aprill. May. Iune.
Adam. Did. Disobediently. Greese. Bring. euerlasting.
Iuly. August. September October. Nouember. December.
Grace. Christ. Foordeth. All. men. Diuellishnes. Forsaking.

In each two verses you haue 12. woordes for the 12. monethes as they are marked ouer the word, nowe euery woord beginneth with the same

same letter that standeth first in the moneth, as Ianuary beginneth with *A*. therefore I haue said in the verse *Alta*. So February with D. as Didit, and therefore in this Table you sée it more plainely.

Ianuary.	A		Aprill.	G	
Februarie.	D		May.	B	
March.	D		Iune.	E	
Iulie.	G		October.	A	
August.	C		Nouember.	D	
September	F		December.	F	

To proue the vse of this rule, I finde in my former verses that the next yére 1584. Easter day wilbe vpon the 19. of *A*prill, which I finde by this word Tunc the first word in the second verse, standing for the yeere. 1584. now I wold learne what shalbe the Dominicall letter that yeere, which I knowe standeth vpon the 19. of Aprill, seeing it will be Easter day.

To know this I call my verse to my remembraunce shewing mee the first letter in Aprill, which beeing the fourth in number, is represented by the fourth woord in my verse which is Gratis, so that G. is the first letter, then from the first I reckon to the eight day and so to the 15. for looke what letter is the first day, the same letter is the 8. and 15. and 22. and 29. on which daies I finde G. then from the 15. to the 19. day I reckon

kon A. for the 19. B. for the 17. and C. for the 18. day, then *D.* standing for the 19. day is the Dominicall letter because it is Easter day.

And the vse hereof is further. As I haue promised to bee in Yorke the 17. day of May next comming in *Anno.* 1584. I would fainde knowe what day of the weeke it is, either Sonday or Munday, &c. To knowe this I recken from Ianuary to May, which as I finde to bee the first moneth in number or in order, so I finde in like order in my verses that the first word Benedicit, beginneth with B. which sheweth that B. standeth in the Kalender for the first of may, then recken to the 15. and there B. standeth, so that the 16. day is C. and the 17. day is D. which wilbe on Sunday, because my former rule hath proued it by finding out Easter day the 19. of Aprill, where D. also standeth.

And as thus you may knowe what letter standeth vpon any day of any moneth: so may you knowe what day euery letter dooth stande for, &c.

The

The Prime or *golden number.*

1583.	A.	B.	C.	D.	E	F.	G.

THis Table I haue héere added not onely for ſuch as can not away with ỹ tediouſnes of learning my verſes, but alſo, to proue whether theſe verſes doo guide you a right to finde out Eaſter day or no.

And this you muſt thus proue. Séeke out the Prime or Golden number in the firſt rowe or order downewardes, for the yéere in which you deſire to knowe Eaſter day, then loke out the Dominicall letter for that ſame yéere. And directly vnderneth the Dominicall letter, and in the order where the Prime ſtandeth, ſhall you finde Eaſter day. As for example. I deſire to know vpõ what day Eaſter day will fall in the yéere 1585. I finde ỹ Prime wilbe 9. the Dominicall letter wilbe C. thẽ vnderneth the letter C in the rowe where the Prime ſtandeth I finde the 11. of *Aprill* which wilbe Eaſter day that yéere, in Anno. 1586. I finde the Prime 10. the Dominicall letter B. then vnderneth and in the rowe where the Prime ſtandeth I finde the 3. day of Aprill for Eaſter day, and ſo you finde it out alwaies, héereafter ſhall followe a rule to finde out the Prime or golden number when I come to ſpeake thereof.

Heere

A rule to finde Easter.

¶ Heere followeth an other necessary Table, *vvherein is placed in your sight, the moueable* feastes with their orderly courses according to the course of Easter day, which being knowen the other wilbe easily borne in memory.

YOu know that there is betweene Shroue Sunday and Easter day, 7. weekes which is 50. daies. as for example Easter day beeing the 22. day of March, you must haue 28. more, which beeing taken out of February there will remaine none, then of necessity it must be the first day of Febuary. Another, If Easter day be the 25. day of Aprill you must haue 25. more which must be taken out of March which will stretch to the 7. day of March which is Shroue Sunday that yeere.

This Table ſerueth to know the *mooueable Feaſtes.*

IN the orders you haue firſt for the Dominicall letter, in the ſecond is placed Shroue Sunday. In the thirde is Aſhwedneſday the firſt day of Lẽt. In the fourth order is Eaſter day. In the fift is Rogatiõ, in the ſixt Penticeſt, in ẏ laſt are numbred the weekes and dayes betwæne the day of the Natiuity of our Lord, and Shroue Sunday. The vſe hereof is, when you once knowe vpon what day of the moneth Eaſter wilbe, which you haue learned by your former rules, thẽ finde out the ſame in this Table. And directly in ẏ ſame line you haue your moueable feaſtes on both ſides. As for exãple, when I finde that Eaſter day wilbe the 22. of March, thẽ Shroue ſundaie ſhalbe ẏ firſt of February, Aſhwedneſday ſhalbe the fourth of Februarie.

And as Eaſter day kæpeth from the twentie two of March to the twentie fiue of *Aprill*. So Shroue ſunday kæpeth from the firſt of Februarie vnto the ſeuenth of March. Whitſunday kæpeth from the tenth of May vnto the thirtenth of Iune. A thing eaſilie committed to memory if wee remember but onlie the firſt day, of eache of the rowes for what they ſtand for.

This rule is eaſily committed to memory, if you will marke it well, this euery one knoweth, that there is 7. weekes betweene Shroue ſunday & Eaſter day likewiſe frõ Eaſter to Whitſunday.

	0		0		0		0

When you are come to the ende of theſe 2. tables you muſt then beeginne againe as ſhalbe ſhewed.

A declaration of these two Tables.

THe one sheweth the Dominicall letter for euery yeare, as well past as to come which I haue put downe heere to helpe such as cannot commit my former rules to memorie. And heere note that when you haue ended your course taking the Dominicall letter in order downe this Table, you may begin againe, as also you may goe backe to finde out the yearely Dominicall letter past, which thing my verses will easily absolue, hauing the Prime and the Dominicall letter ouer euery word, as the yeares do succéd one an other.

The other Table serueth to know the number called the Prime, and the number called the Epact.

The Prime is a number that beginneth with 1. and encreaseth yearelie one tell it come to 19. And then it begins with 1. againe. This Table serueth for such as cannot skill of numeration but of those that haue some taste of Arithmeticke. This number may be found out thus, know the yeere of the Lord wherein you would know

knowe the golden number. And adde thereto one, then diuide the same by 19. take away the nineténes and the remaine is the Prime, if nothing remaine thē 19. is the Prime. As the yeere 1584. I would knowe the Prime, I adde 1. and then is the number 1585. I deuide it by 19. and there remaine 8. which is the Prime that yeere An other way more ready in this, cut of from the yeere of our Lord 1500. And take the remaine and deuide that by 19. and the remaine of that shalbe the Prime. As in the yeere 1580. I reserue 1500 so there remaineth 80. I deuide it by 19. and 4. remaineth for the Prime. In Anno. 1588. I first leaue 1500. and I take 88. whē I haue diuied it by 19. I shall leaue 12. which wilbe the Prime that yeere.

To know the Epact doo thus.

WHen you haue found out the Prime or golden number multiply it by 11. and then diuide it by 30. The remaine is the number of the Epact which you desire to knowe.

And heere you may also note that bothe the Prime and also the Epact make their reuolutiones in 19. yeeres, yet the Epact riseth to 29. the Prime but to 19. which thing is not to be doubted of though it rise from 1. to 29. and finisheth

his

his course in 19 yeeres, if you consider this. That certaine numbers there are which neuer make the number of the Epact, as these 2.5.8.10 13.16.19.21.24.27. being in number 10. these neuer make the Epact. So that if you take them away, then you shall leaue but 19. to make the Epact which are these. 1.3.4.6.7.9.11.12.14. 15. 17.18.20.22.23.25.26.28.29.

¶ *Whereto the knowledge of the Epact serueth.*

THe knowledg of the Epact serueth to finde out the age of the Moone, for when you knowe the number of the Epact, you must reckon how many dayes of ẏ moneth are past, wherein yee desire to know the age of the Moone, reckoning the present day for one. Then the number of the monethes past beginning at March, to the moneth present, reckoning March for the first, & your moneth present for ẏ last, in which moneth you would be resolued of the age of ẏ Moone. Adde these 3. numbers put together vzt the Epact, the dayes of the moneth, and the number of the monethes past. If these numbers put together arise not to 30. then that number is the iust age of the moone, if it exceede 30. then abstract 30. and the remaine sheweth how many dayes the Moone is olde.

For

A rule to finde Easter.

For example I desire to know the age of the Moone, vpon Christmas day next comming, first I finde the number of the Epact 17. Christmas day is the 25. of December, from March to December are 10. Monethes then adde all these. 3. numbers together.

The. Epact.	17	These nnmbers added together doo amount to from which
The dayes of the moneth past,	25	
The number of the monethes past.	10	
the number of.	52	

I subtract 30. and the residue is 22, which is the age of the Moone that day viz 22. dayes olde. And thus may you doo any other time or day.

But if when you haue subtracted 30. nothing shall remain: then it is the chaung day.

Thirtie dayes hath November,
Aprill, Iune and September:
Februarie hath twentie eight alone,
And all the rest hath thirtie and one.

¶ A Table shewing how many howers the Moone shineth euery night throughout the whole yeere.

Iune.	July	August.	Septem.	Octob.	Nouē.	ætas lunæ

A rule to finde Easter.

BY this Table it will appeare vnto you howe many howres ỹ Moone shineth throughout the yeare. In the middest whereof is placed the age of the Moone, and vnderneath are set 2. letters H. and M. signifying howres and minutes, aboue are set the names, of the twelue monethes of the yeere. So that if you desire to know howe many howres the Moone shineth at any time of the yeere.

You must loke as well to the age of the Moone as to the moneth of the yeere, wherein yee seeke the age of the Moone. And directlie you shall finde howe manie howres and minutes she shineth, if the Moone bee foure dates olde, in Iune for it maketh no skill what day of Iune, then vnder the title of Iune, and in the order or rowe that you finde the Moone foure dayes olde you shall finde that shee shineth two howres, againe the Moone beeing thirteene dayes olde in *December* vpon any day of that moneth, then looke vnder the title of *December*, and you shall perceiue that shee shineth foureteene howres and eighteene minutes. Whether it bee the first the second third or last day of December, all is if the Moone be so olde. &c.

This

This Table

might haue beene made some-
what lesse if I had placed
January and Nouember together, and Fe-
bruarye and October together,
March and September together, for
that the Moone hath a like order
in them, but this is the plainest
way.

¶ This declaration serueth for the Table before.

HEere for the benefit of and ease of such, as vse the water to passe by tide from out of Kent to London, I haue in this Table drawne out the times aswell of the full Sea as of the lowe water. At Graues-ende, at Eryth and at London. So that if you would know the tide at any of these three places, thus must you vse this Table, first learne the age of the Moone: and in the same order yee shall haue the full Sea and lowe water at the place according to his title, by the howre of the clocke and minute which be also noted with H. signifying the howre and M. the minutes.

¶ *In which Table you may learne what Moone maketh the full Sea at the said* places, as at London a Southwest Moone *maketh a full Sea, at Graues-ende South* Southwest Moone, at Erith Southwest and by South.

¶ A necessarie rule to knowe

the beginninges and endinges of euery

Terme, with their returnes. 23

Hillarie Terme beginneth the 28. day of Ianuary if it be not Sunday, for then it is referred vntill the next day following And it endeth the 12. day of February, & hath foure returnes, that is to say.

1. Octauis. Hillarii. } Crastino. Purificat } 3
2. Quind. *Hillarii* } Octau. Purificat. } 4

Easter Terme beginneth 17. dayes after Easter and endeth the Monday next after the Assention day and it hath 5. returnes.

Quind Pasche. 1 Mense Pasch. 3 Quinq. Pasch. 4
Tres Pasch. 2. Crastino. Asēt 5

Trinitie Terme beginneth ỹ Friday next after Trinity Sunday & endeth the Wednesday fortnight and it hath 4. returnes, that is to say.

Crastino. Trinitatis. 1. Quind. Trinitat. 3.
Octauo. Trinitatis. 2. Tres. Trinitatis. 4.

Michaelmas Terme beginneth the 9. of October if it be not sunday & endeth the 28. or 29. of Nouember and hath 8. returnes.

Octau. Michael. 1. Crastino. *Animarū*. 5
Quind. *Michael*. 2. Crastino. Martini. 6
Tres. Michaelis. 3' Octauis. Martini. 7
Mense. Michael. 4. Quind. Martini. 8

Note also that the Eschequer openeth 8. daies before any Terme begun, except Trinitie Terme which openeth but 4. dayes before.
